IMPACT CRUSHER

XP1214D

Capacity (t/h)
80-450

Screening machine
3

Curb Weight
74300 kg

www.constructiondieselequipment.com.au

The XPF1214D is a high-output impact crusher designed for aggregate production, civil construction, quarrying and recycling. With a capacity range of 80–450 t/h, it delivers strong reduction ratios and produces well-shaped material ideal for road base, concrete aggregate and civil projects. Built tough for abrasive material and rough job sites, this machine is a reliable mid-to-high capacity option for contractors needing flexibility across multiple applications.

KEY PERFORMANCE SPECS

Type:	Impact crusher
Capacity:	80–450 t/h

ADDITIONAL SPECS

Typical Applications:	Quarrying, civil works, recycling
-----------------------	-----------------------------------

KEY BENEFITS

- 80–450 t/h throughput for versatile production
- Strong reduction ratios for clean, consistent sizing
- Ideal for road base, concrete aggregates and recycled material
- Handles hard rock and demolition waste
- Simple setup and operator-friendly controls
- Solid build suited to harsh conditions
- Easy maintenance with good service access

BEST SUITED FOR

- Quarry and civil aggregate production
- Road base and construction materials
- Demolition and recycling operations
- Secondary crushing after jaw or cone
- Contractors needing flexible, high-volume processing

WHAT CREWS LIKE ABOUT IT

- Strong reduction and shaping performance
- Works well on both virgin and recycled material
- Reliable operation on long shifts
- Easy adjustments and maintenance
- Good all-rounder for civil and quarry contractors
