The XFY1561 is a heavy-duty screening unit designed for quarrying, mining, civil construction and recycling operations that need reliable, high-volume material sorting. With a 1550 × 6100 mm screen deck, this machine handles large throughput and produces clean, consistent product across multiple fractions. Built tough for harsh Australian conditions, the XFY1561 is a staple for contractors and quarries needing stable screening performance on long production days.

### KEY PERFORMANCE SPECS

Disposal capacity:	60~300 t/h
Max. Speed:	1 km/h

### ADDITIONAL SPECS

Diesel tank capacity:	350 L
-----------------------	-------

### KEY BENEFITS

- Large 1550 × 6100 mm screen for high-output screening
- Produces clean, consistent aggregate sizing
- Handles sand, gravel, crushed rock and recycled material
- Heavy-duty build for harsh site conditions
- Simple, intuitive operating controls
- Easy access for maintenance and screen changes
- Reliable performance for long civil and quarry shifts

### BEST SUITED FOR

- Quarry aggregate production
- Civil construction material supply
- Mining and bulk material processing
- Crushing circuit integration
- Recycled material screening
- Contractors needing high-capacity screening performance

### WHAT CREWS LIKE ABOUT IT

- Big screen area = big production
- Consistent product sizing across multiple grades
- Solid build that handles tough conditions
- Easy maintenance and screen swaps
- Reliable for long, demanding screening runs
