2300(mm)

**Number of
Cutters**

200(piece)

**Milling
Depth**

430(mm)

www.constructiondieseequipment.com.au

The XLZ2305K is a high-performance soil stabiliser and recycler built for large-scale road reconstruction, base improvement and deep soil mixing. It delivers serious cutting force with its 2300 mm working width and 430 mm mixing depth, powered by a massive 571 kW Perkins engine. Designed for heavy civil workloads, this machine handles inconsistent ground, thick pavements and demanding mixes without slowing down — a true workhorse for big infrastructure jobs.

KEY PERFORMANCE SPECS

Working Width:	2300 mm
Working Depth:	430 mm

ADDITIONAL SPECS

Engine:	Perkins
Power:	570.5 kW

KEY BENEFITS

- 2300 mm working width for strong daily production
- 430 mm mixing depth — ideal for deep soil treatment
- Huge 571 kW Perkins engine
- Efficient, high-torque milling drum
- Stable, predictable machine handling
- Simple, operator-friendly controls
- Built for long, hard civil shifts in tough Aussie conditions

BEST SUITED FOR

- Road base rejuvenation
- Soil stabilisation with lime/cement
- Full-depth pavement recycling
- Infrastructure and highway projects
- Mining and industrial applications
- Contractors needing strong mid-to-deep mixing power

WHAT CREWS LIKE ABOUT IT

- Big torque from the Perkins engine
- Strong material breakdown and blend quality
- Stable even on inconsistent or soft ground
- Good operator visibility and control
- Excellent performance on major road rebuilds
- Durable design for harsh civil environments
