The GR2605AT is the
The XD140TT is a 14-tonne tandem roller built for serious asphalt work, featuring twin-drum drive for improved traction, better climb performance and more consistent compaction on challenging surfaces. It's designed for major road construction, industrial pavements and civil projects where crews need a roller that grips, compacts and finishes cleanly — even in tough conditions. Strong vibration, a reliable Cummins engine and stable handling make it a favourite for high-output asphalt teams.

KEY PERFORMANCE SPECS

Engine:	Kubota
Rated Power:	33.6 kW
Emission:	EU Stage V / T4F

ADDITIONAL SPECS

Op Weight:	3200 Kg
Working Width:	1290 mm

KEY BENEFITS

- Twin-drum drive for stronger traction and control
- 14-tonne class — ideal for major civil and asphalt jobs
- Smooth drum finish for premium asphalt surfaces
- Reliable Cummins power
- Strong vibration output and compaction force
- Stable, predictable handling on varied ground
- Easy daily checks and simple maintenance

BEST SUITED FOR

- Highway and major road construction
- Industrial pavements and commercial sites
- Airport and large infrastructure projects
- Steeper or slippery asphalt applications
- High-output asphalt crews
- Contractors needing superior traction and smooth finish

WHAT CREWS LIKE ABOUT IT

- Twin-drum drive makes a real difference on tricky surfaces
- Clean, consistent asphalt finish
- Reliable power for long shifts
- Stable and comfortable to operate
- Strong compaction output
- Built tough for heavy civil production
