The XCMG XC600S is a high-capacity material handling and processing system designed for efficient bulk material handling in quarrying, recycling and industrial applications. With strong output capacity and stable operation, it supports continuous, high-volume production.

### KEY PERFORMANCE SPECS

Total Installed Power:	216 kW
Production Capacity:	600 t/h

### ADDITIONAL SPECS

Working Area:	728 m <sup>2</sup>
---------------	--------------------

### KEY BENEFITS

- High production capacity for bulk materials
- Efficient and stable continuous operation
- Large working area for improved productivity
- Reliable performance in demanding environments
- Built for heavy-duty industrial use

### BEST SUITED FOR

- Quarry and aggregate processing
- Recycling and material handling operations
- Industrial material production sites
- Projects requiring high-volume output
- Continuous, large-scale operations

### WHAT CREWS LIKE ABOUT IT

- Consistent, high-capacity performance
- Smooth and stable operation
- Handles large volumes efficiently
- Simple, reliable system design
- Built tough for long service life
